PROFESSIONAL SUMMARY

MCA graduate and Full Stack Developer with hands-on experience in designing, developing, and deploying MERN stack applications. Built projects ranging from cloud security analytics platforms with machine learning integration to responsive web applications using React.js and Node.js. Proficient in REST API development, authentication, database management, and modern development tools, with a strong passion for building scalable and impactful software solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Tailwind CSS, Framer Motion, HTML5, CSS3, Responsive Design
- **Backend & Security:** Node.js, Express.js, REST APIs, JWT Authentication, RBAC
- **Databases & Cloud:** MySQL, MongoDB, AWS (DynamoDB), Vercel | **Tools & Platforms:** Git, GitHub, Postman
- **Languages:** Java, JavaScript, Python | **Additional:** Socket.IO, API Integration, Machine Learning Fundamentals

PROJECTS

Cloud User Behavioural Analytics (UBA) System (Major Project)

MERN Stack + Python (Machine Learning), REST APIs, JWT, Socket.io | Live Demo: cloud-uba.vercel.app

- Architected a decoupled Node.js and Python platform, implementing an unsupervised Isolation Forest algorithm for real-time insider threat and cloud anomaly detection.
- Integrated a Zero Trust security framework (JWT, RBAC, device fingerprinting) paired with a Socket.io-based SOC alerting system for instant threat monitoring.

Full Stack Authentication System

React.js, Node.js, Express.js, MongoDB, JWT | Live Demo: secure-auth-app.vercel.app

- Developed a secure authentication system featuring JWT-based login, registration, role-based access control (RBAC), and protected routes.
- Integrated React frontend with Node.js/Express backend and MongoDB, implementing password encryption, persistent sessions, and secure API authorization.

Blog Management Platform

MERN Stack | Live Demo: blog-master-beta.vercel.app

- Developed a secure, responsive blog management system featuring category-based filtering, detailed blog pages, and seamless navigation for an optimized reader experience.
- Implemented user authentication, interactive comment sections, and contact features to drive user engagement and streamline the content creation workflow.

Weather Forecasting Web App

React.js + OpenWeather API | Live Demo: climacast-app.vercel.app

- Developed a responsive weather forecasting application using React.js and OpenWeather APIs, providing real-time weather conditions, 5-day forecasts, city-based search, and automatic geolocation-based weather updates.
- Enhanced user experience through interactive charts, clean UI, and optimized API handling for faster performance.

INTERNSHIP

Web Development Intern - Hebbale Academy | 45 Days

- Worked on front-end and back-end web development using HTML, CSS, JavaScript, and Python.
- Gained practical experience with AWS services including DynamoDB (NoSQL) and cloud deployment.
- Collaborated in a team to deploy functional modules and improve UI/UX features.

MEAN & React JS Training – MCA PL | June 2025

- Completed intensive training on full-stack development using MongoDB, Express.js, Angular, Node.js (MEAN), and React.js, building scalable web applications through guided projects.
- Earned Grade “B” certification, demonstrating strong proficiency in modern web development technologies.

EDUCATION

- **Master of Computer Applications (MCA)** - GIET University, Gunupur Odisha | Graduated 2026 | CGPA: 8.21
- **B.Sc. in Physics (Hons.)** - Berhampur University, Berhampur, Odisha | Graduated 2023 | CGPA: 7.2

CERTIFICATIONS

- NPTEL Certification on Internet of Things (IoT) | Elite (Score: 61%)
- Participated in Agentic AI Hackathon 2025 organized by Hebbale Academy at GIET University.
